

# N<sup>o</sup>585

## High-Performance Integrated Amplifier

The N<sup>o</sup>585 offers the luxury audio buyer an attractive entry point to Mark Levinson ownership. The N<sup>o</sup>585 is envisioned and constructed as a new design, with significantly higher power, improved performance, and updated features that address market shifts in content delivery via computer-based digital audio.

### Features

Sophisticated DACs and a broad array of digital inputs suitable for modern high-quality sources including high-definition 32-bit/192 kHz computer-based audio and DSD native and PCM via USB, along with four analog inputs result in a compelling centerpiece for a truly high-end audio system

A next-generation industrial design blending iconic Mark Levinson historical elements with a modern appearance for an unsurpassed look and feel of quality

Highest resolution discrete analog circuitry throughout, with high current class AB power amp channels providing output quality and power suitable for high-end loudspeakers

Harman Clari-Fi<sup>®</sup> Technology

80 Hz high-pass option allows proper operation of a 2.1-channel system

Ethernet, RS-232, IR and 12V trigger ports

IR remote control

Assembled and tested in USA

Upgradable firmware

Detachable IEC power cord

### Benefits

Versatility and flexibility

Iconic Mark Levinson industrial design complements any decor

Unsurpassed power and performance

Restores information lost during compression resulting in fuller more dynamic sound

Heightened realism

Variety and convenience

Ease of use

Reliability

Protects your investment

Ease of use
