

ADDENDUM to Instruction Manual Regarding Grille Scrim:

Your Revel C363XC/C383XC In-Ceiling Architectural Loudspeaker includes 2 standard white cloth scrims and 1 waterproof black cloth scrim, located in the plastic bag that also contains this instruction manual.

For standard installations in **dry locations**, use only 1 white scrim by fitting it to the inside of the metal grille prior to attaching the grille to the speaker frame, as described on Page 6 of the Instruction manual.

For installations in **extreme climate locations** that are exposed to damp, wet, or humid weather conditions, use all 3 scrims by placing the weatherproof black scrim between the other 2 white scrims, and fitting them together to the inside of the metal grille prior to attaching the grille to the speaker frame, as described on Page 6 of the Instruction manual.

PAINTING: Do not paint scrims. If you plan to paint your grille, be sure to let the paint dry prior to fitting your scrim to the grille. For extreme climate locations, be sure to use exterior paint on the grille.
